

VoipNow Payment Plugins

This guide offers guidelines and references for anyone wishing to modify, extend, or contribute to the 4PSA VoipNow Automation payment plug-ins. Third-party products can interact with the system and may offer more payment options, according to their needs.

A VoipNow Automation Payment Plug-in is a set of functions, written in the PHP scripting language, that defines the interaction of both VoipNow Automation and the Automation Store with a certain gateway or payment processor.
