Important Notes

Deprecating Notice

Please read [VoipNow Deprecating Notice](#) before going further.

Before Upgrade

Upgrade from VoipNow version < 5.0.0

This upgrade is not supported. Please upgrade first to VoipNow 5.2.5 or a later version.

Upgrade from VoipNow version > 5.0.0

No special instructions should be followed.

Installation/Upgrade

In order to install or upgrade to VoipNow 5.6.0, download the installer on your server by executing the command below:

```
curl https://www.4psa.com/software/zen.release-2022.2 -o /etc/yum.repos.d/zen.repo
```

The installer is compatible with Red Hat Enterprise Linux 8, AlmaLinux 8 and Rocky Linux 8. VoipNow 5.6.0 will not run on other Linux distributions.

Install the downloaded package:

```
dnf -y install voipnow-installer
```

Run the installer by executing the following command.

```
/usr/bin/voipnowinstaller
```

This script can upgrade from VoipNow 5.x versions.

Limited Release Notes

The current release notes contain only the changes that in our opinion might affect existing VoipNow customers.

Legend
