

Hosted PBX

Our integrated solution offers all the resources needed for running the hosted PBX business in one package. Great service at the lowest cost per customer.

Major Opportunity for Service Providers

Offering hosted Unified Communications is a major opportunity for service providers and the hosted PBX service is the legacy component that simplifies adoption for customers.

A Better Substitute for PBX

Unified Communications replaces on-premises legacy PBX systems with its lower-cost savings, flexibility, features, and integration with computers.

The Best Solution for Customers

Unified Communications provide businesses with new methods to improve internal communications, as well as their relationship with partners and customers.

Benefits

The hosted PBX service must provide **more than telephony services**. VoipNow brings together Unified Communications, by integrating voice, video, user presence, faxing, instant messaging, and email groupware.
