

Service Provider Email Templates

This page describes how to edit email notifications and lists the tags required for the customization of service provider email templates.

- [Overview](#)
- [Edit a template](#)
- [Email template types](#)
- [Restore default settings](#)

Overview

To access the **Email Templates Management** page, go to **Unified Communications** in the side menu and click on the [Email Templates](#) icon in the **System Templates** area. VoipNow can email these notifications to the system administrator(s), the service providers and/or to a custom email address.

Edit a template

To customize the subject or the content of an email notification:

1. Click the  icon corresponding to the chosen event.
2. In the Edit Email Template page enter the email subject and email body keeping in mind that:
 - You may use only plain text when writing the email subject and body. The email is also sent in plain text format.
 - You can include tags that will be automatically replaced by the system with the appropriate content (e.g. [recipient_name] is replaced with the name of the person receiving the notification).
3. Click **OK** to save the changes to the email template. To return to the previous page without saving the changes, click **Cancel**.

Email template types

VoipNow comes with several email templates.

- **Service Provider account creation:** This email notification is sent when a new service provider account is created.

Tag	Details
[contact_name]	The name of the service provider that has just been created, as it was specified in the submitted service provider information.
[recipient_name]	The name of the person who receives the email.
[login]	The username that will be used to connect to the service provider account, as it was specified in the submitted service provider information.
[password]	The password that will be used to connect to the service provider account, as it was specified in the submitted service provider information.
[billing_plan]	The name of the billing plan employed for this particular account.
[template]	The name of the service provider template used to create this account.
[interface_language]	The language used by the VoipNow interface when this account is logged in.
[company_name]	The name of the company, as it was specified in the submitted service provider information.
