

Create PhoneCalls

This page describes the UnifiedAPI phone call types that can be created.

Create PhoneCalls

The following types of phone calls can be created:

| Name | REST URI | Description |
|------------------|----------------------------------------------------------------|--------------------------------------------------|
| Simple calls | <div>POST</div> <div>/phoneCalls/userId/simple</div> | Refers to calls made between two parties. |
| Conference calls | <div>POST</div> <div>/phoneCalls/userId/conferenceInvite</div> | Refers to calls made using a conference. |
| Callback calls | <div>POST</div> <div>/phoneCalls/userId/callback</div> | Refers to calls made using a callback extension. |
