Examples

Enable Service Provider Child Accounts Management

The example below enables Organizations management as well as Extensions and Users management for the service provider account.

```
/usr/local/voipnow/bin/accountprefs.sh --update newserviceprovider --organizations_mng true --extensions_mng true
```

Set Service Provider Permissions and Limits

The example below enables all of the service provider's permissions and sets all its limits to the 100 value.

```
/usr/local/voipnow/bin/accountprefs.sh --update newserviceprovider --organizations_mng true --organization_perm_mng true --extensions_mng true --bill_plans_mng true --ext_feat_mng true --sounds_mng true --phone_sip_mng true --see_stacked_mng true --strunk_mng true --callapi_manag true --callerid_manag true --public_phone_mng true --prov_manag none --allow_see_extensions true --organizations_cnt 100 --users_cnt 100 --terminal_cnt 100 --queuemember_cnt 100 --queue_cnt 100 --ivr_cnt 100 --conference_cnt 100 --callback_cnt 100 --callcard_cnt 100 --callerid_cnt 100 --callcardcode_cnt 100 --intercom_cnt 100 --voicecenter_cnt 100 --queuecenter_cnt 100 --mailboxes_cnt 100 --voice_size 1200 --record_size unlimited --storage_size 20--max_concurrent 1000 --max_intconcurrent 1200 --expire unlimited
```
