

Service Provider's Custom Buttons

This page contains instructions on how to configure a service provider's control panel to accommodate custom buttons.

- [Overview](#)
- [Add custom buttons](#)

Overview

You can customize the service provider's control panel functionality by adding custom buttons linked to specific URLs. The **Custom Buttons for Account <service_provider_name>** page allows you to:

- view the list of Custom Buttons set up for the current service provider
- define a new button by clicking the [Add custom button](#) icon available in the **Tools** section
- modify the existing custom buttons settings
- remove unused buttons from the system

Add custom buttons

To add a new button, go to the **Add Custom Button** page and customize the following parameters:

Settings

For the service provider, there are three inheritance levels:

- **0** – The button is visible only to the service provider. At all times, the inheritance level 0 represents the logged-in user. For each child user, the level is incremented with 1.
- **1** – The button is visible to the service provider and the organizations.
- **2** – The button is visible to the service provider, the organization, and the users.

Limits

The [Customization](#) page provides all the necessary information on the limits that apply in the case of service providers as well.

To find out more on how you can manage a service provider's custom buttons, check the [Customization](#) page.
