System Authentication

About System Authentication

This area describes how to customize a series of login preferences as well as how to allow or deny system access to users based on their IP addresses. You will also find explanations on how to configure OpenID settings that apply to all system users as well as how to add a new OpenID provider to the system.

Get Help
If you still have trouble logging in or configuring authentication, do not hesitate to ask for advice and follow VoipNow administrators in the GetSatisfaction community.

If you need more help, our expert engineers are waiting for you in the 4PSA Support Zone.
