

How to generate Calling Card codes

Applies to VoipNow 3 and higher!

VoipNow features a calling card code generator that can automatically create unique card numbers. This article describes the steps you need to take to configure the card code generator.

Step-by-step guide

To use the calling card number generator:

STEP 1: Choose the Calling card extension you want to use.

STEP 2: Click the **Card codes** icon available in the extension's **Quick Links** section.

STEP 3: Then click the **Generate card codes** icon and fill in the fields using the explanations below:

- **Number of codes to generate:** The number of codes to be generated.
- **Codes must have <x> digits:** The generated codes will be **<x> digit** long.
- **Calling cards must have PIN:** Enable this option if you want PINs to be generated for the new calling card numbers.
- **PIN must have <x> digits:** The generated PIN numbers will be **<x> digit** long.
- **Initial credit on each calling card:** Set the initial credit for the generated calling cards or enable the **Unlimited** option.

STEP 4: Press **OK** when you're done, and the calling card codes will be generated.
