

What is the difference between stacked and exclusive numbers

Applies to VoipNow 3 and higher!

Stacked numbers

The Direct Inward Dialing (DID) numbers defined as **stacked** are available to all the Service Providers in the system without being specifically assigned.

If a Service Provider assigns a DID number to one of their owned accounts, the number will no longer be available to other Service providers.

Exclusive numbers

The system administrator assigns the Direct Inward Dialing numbers defined as **exclusive** to the Service Providers that will be using them.
