

Global SRV Records

In this area you can manage services and protocols that will be used by SRV Records in forward zones.

To access this page, click the **Settings** link in the left navigation panel. Next, click the **Global SRV Records settings** icon available in the **Options** area. Multiple actions can be performed:

- Add a new service and protocol
- See the list of services and protocols already available in DNS Manager

View the services and protocols list

DNS Manager displays the following information about each service or protocol:

- **Name** - the service or protocol name
- **Type** - can be service or protocol

Add new service or protocol

In **New services and protocols** area, use +/- buttons to add more items. These items cannot be duplicated.

Only alphanumeric characters are accepted for this items.

You cannot remove any data from this page!
